IS Series
Mid-Frequency Inverter
Resistance Welding Control

- 300, 800, and, 1400 Amp primary output current resistance weld control
- Six feedback modes for optimum feedback based on process and expected variability
- Built-in current, voltage, power, time and pulse monitor for precise process control
- Triple pulse weld profile: W1, W2, W3, up to 19 pulsations per weld segment
- Displacement and force monitoring Initial, Final and "Weld to" displacement
- Cascade option: 5 and 7 way cascade IS-800CA only
- RS232, RS485, EtherNet/IP communications

KEY FEATURES
Wide Current Range
The IS Series weld controls provide a wide range of current (.050 kA - 80 kA) to meet all your application needs. See specifications of individual controls on back. Higher current up to 320 kA available upon request.

Displacement Limits & Force Monitoring
Dial-in the weld process by utilizing the IS Series’ displacement and force features including initial part thickness, weld-displacement, and final displacement limits. Monitor the force of each segment of the weld pulse.

Six Weld Control Modes
Six different weld control modes allow the user to select the best mode for the application: primary limit, primary and secondary RMS, power RMS, voltage control, or pulse percent.

Triple Pulse Weld Capability
Provides flexible weld profiles with up to three pulses in each weld cycle. Each weld segment can be programmed with upslope and downslope and may have up to 19 pulsations per segment. Users may change the control mode for each weld segment.

Factory Automation with Ethernet IP
Ethernet IP factory communications comes optional IS Series for integration into automation environments. It comes with built in Panel View screens for easy control of IS unit.

TYPICAL APPLICATIONS
- Commutator fusing
- Wire termination
- Sheet metal welding
- Braided cable termination

**Options & accessories**
- EtherNet/IP, RS-485 communications (RS-232 standard)
- CE Filter
- Isolation contacts
- Programming pendant MA-660A

**Power source**

- 24 VDC valve option (115 VAC standard)
- 2 amp
- 5 amp
- 250 VA valve transformer (150 VA standard)
