

BENCHMARK® SM-8500A Parallel Seam Sealing System

Packed with advanced features, the Windows®-based SM-8500A parallel seam sealing system, reliably performs welding, brazing and soldering processes on a variety of metals, metal alloys, plated materials, and solder preforms. It can be operated as a stand-alone unit or fully integrated into an environmental enclosure for a complete closed loop hermetic sealing process.

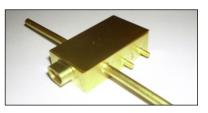

KEY FEATURES

- Utilizes the advanced HF-2500A 25 kHz closed-loop feedback weld power supply
- Programmable electrode force enables user to optimize both force and energy
- Indexed electrodes ensure extended, even wear providing superior results
- Position-based weld pulses provide increased or decreased energy at part corners reducing corner leaks
- Electrode roll-back feature facilitates electrode release from light weight parts
- Circular mode seam sealing allows processing of round parts

TYPICAL APPLICATIONS

WIDE RANGE OF PART PROCESSING CAPABILITIES

- Operates as tacker only, sealer only, or combined tacker-sealer
- Four-pass welding feature starts weld from center and welds to the part corner - for large part sealing
- Set different energy levels for each axis welded for higher yields on rectangular parts
- Many tacking options tack center, four-side tacking, multiple tacking
- Real time monitoring of weld inhibit inputs such as moisture, oxygen, and helium levels
- Unlimited weld schedule storage
- Lid hold down feature assists tacking process
- Multiple weld schedule chaining feature
- Optional CCTV camera available to assist the operator for improved lid placement
- Batch reporting option
