

Model THP Tweezer Handpiece

- Includes 1 pair
ET0402 electrodes

Model PHP Probe Handpiece

- Includes 1 pair
EP0402
electrodes
for handpiece
and 1 pair
EP0802 for probe

Model HFP High Force Probe

- Includes 1 pair
EP0802 electrodes

Model GHP Handpiece

- Includes 1 pair
EP0802 electrodes,
straight extension
and 30° elbow
adapter

Model HDHP Heavy Duty Handpiece

- Includes 1 EP0902 straight electrode,
35 or 90 degree electrodes available
4-30149-02, 10 ft #2 gauge grounding
cable sold separately

Model VBTWK/115, Ball Tacking Kit

- Includes vacuum pump,
vacuum adapter, tubing
and 2 electrodes for
1 mm ball. Used with
GHP and HFP

10-400-01, VBTWK/115V
10-400-02, VBTWK/230V

Accessories

A successful resistance spot welding process generally requires a welding power supply, a spot welding head, and a weld monitor or weld checker. Selecting the right accessories for these critical components can enhance and improve your results, and provide additional safety for your operators.

HANDPIECES

Generally speaking, welding handpieces should be used only when it is impractical to use a welding head. Their relative ease of use, combined with low maintenance and flexibility, make them well-suited for small batch production and R&D environments.

Both the Model THP Tweezer, and PHP Probe Handpiece are used to weld small parts which require less than 125 watt-seconds or 1/2 cycle AC, and welding forces less than 7 pounds. The Model HFP High Force Probe is used for applications which require higher energy and/or force than either THP or PHP. All three models are force fired to ensure repeatability.

The Model GHP and HDHP are switch fired handpieces and can be used to weld or tack materials that don't require stringent force control.

Handpieces are available with either 4 ft or 10 ft long cables. As a general rule, the energy delivered to the workpiece with 10 ft #6 cables will be approximately 15% of that delivered with 4 ft #6 cables. Handpieces are furnished with cables, as indicated in the following table, and one pair of RWMA electrodes.

Rating	THP	PHP	HFP	GHP	HDHP
DC (watt seconds)	125	125	500	125	500
AC (KVA-1/2 cycle)	2	2	7.5	2	10
Force Range – Max (Min)	7 lb (1.0 lb)	7 lb (1.0 lb)	25 lb (3 lb)	N/A	N/A
Cable Size (AWG)	#2 or #6	#2 or #6	#2	#2 or #6	#2
Cable Length	4 ft or 10 ft	4 ft or 10 ft	5 ft or 10 ft	4 ft or 10 ft	7 ft
Electrode Series	ET0400	EP0400 or EP0400	EP0800 and EP0800	EP0800	EP0900

Accessories are an important part of any welding system. For your convenience AMADA WELD TECH provides:

OPTIC ACCESSORIES

Two versions of the SMZ-460 are available for a wide range of magnification. The model 10-395-01 uses a 10X eyepiece and has a magnification range of 3.5 - 15X. The model 10-395-02 uses a 20X eyepiece and has a magnification range of 7.5 - 30X. Both utilize the 0.5X objective lens and have a working distance of 181 mm. Its lightweight housing is airtight, anti-mold and anti-electrostatic. It includes the C-Bonder Arm and is compatible with any LT-050B or TL-080B welding head.

The Model OMA Optic Mounting Assembly (2) provides the posts and hardware required to support the optic pod. The Model BPTL, THIN-LINE® base plate (3) is drilled to accept all TL-080B THIN-LINE weld heads and the optic mounting assembly. The base plate is 6 inches wide x 14-7/8 in deep x 1/4 in (15.2 cm x 37.8 cm x 6.3 mm). The BLFOI Fiber Optic Illuminator System (4) transmits light through bifurcated, fiber optic light guides to produce cool, flicker-free, high-intensity light at the worksite. The model BFLOI operates at voltages from 90-250 VAC, 50/60Hz.

IVSC VISION SYSTEM

The Model IVSC (Inspection Vision System w/Camera) is a standalone system and contains a macro video lens on extended post stand with HD measurement camera and diffused LED ring light. Includes 23 in LCD monitor and flash card for saving images.

MODEL TMMWC

The Model TMMWC (Trinocular Mounted Microscope with Camera) Stereo Zoom Microscope is supplied with 10X eyepieces and a 0.5X objective lens. It provides magnification which is adjustable from 4.0-25X and a working distance of 211 mm. It is available with mounting kits for weld heads shown in table below or sold as standalone system using part

number 270-607 noted below. It is compatible with most SR-070A or TL-080B Series welding heads.

LOUPE

An eye loupe is an indispensable item for quick observation. This pocket sized tool will magnify the process 10x and allows for the first line of inspection.

MICROSCOPE KITS

Kit Number	Description	Applicable Weld Heads
10-430-03	SMZ-460, 15X Stereo Microscope kit, Includes OMA, BPTL and BFL0I-LED, 120/230 VAC, 181 mm working distance	TL-080B, TL-086B, TL-087B
10-430-04	SMZ-460, 30X Stereo Microscope kit, Includes OMA, BPTL and BFL0I-LED, 120/230 VAC, 181 mm working distance	TL-080B, TL-086B, TL-087B
10-431-03	SMZ-460, 15X Stereo Microscope kit, Includes OMA, and BFL0I-LED, 120/230 VAC, 181 mm working distance	SR-071A
10-431-04	SMZ-460, 30X Stereo Microscope kit, Includes OMA, and BFL0I-LED, 120/230 VAC, 181 mm working distance	SR-071A
10-432-03	SMZ-460, 15X Stereo Microscope kit, Includes OMA2, and BFL0I-LED, 120/230 VAC, 181 mm working distance	SR-072A, TL-180B
10-432-04	SMZ-460, 30X Stereo Microscope kit, Includes OMA2, and BFL0I-LED, 120/230 VAC, 181 mm working distance	SR-072A, TL-180B
10-433-01	SMZ-460, 15X Stereo Microscope kit, Includes BFL0I-LED, 120/230 VAC, 181 mm working distance	LT-050B, and any weld head with existing microscope mount**
10-433-02	SMZ-460, 30X Stereo Microscope kit, Includes BFL0I-LED, 120/230 VAC, 181 mm working distance	LT-050B, and any weld head with existing microscope mount**
10-434-01	SMZ-460, 15X Stereo Microscope kit, Includes Series 320 weld head stand, OMA352 microscope mount, BFL0I-LED, 120/230 VAC, 181 mm working distance	SL-320 Series weld heads
10-434-02	SMZ-460, 30X Stereo Microscope kit, Includes Series 320 weld head stand, OMA352 microscope mount, BFL0I-LED, 120/230 VAC, 181 mm working distance	SL-320 Series weld heads
10-440-01*	IVSC, Inspection Station, Includes Macro lens, Stand, Ring light, Smart Camera w/measurement tool, 23 in LCD monitor	N/A
10-450-01*	TMMWC, Trinocular Micro Scope Kit, Includes 1080P HD Camera, 23 in LCD Monitor, OMA, BPTL and BFL0I-LED, 120/230 VAC	TL-080B, TL-086B, TL-087B
10-451-01*	TMMWC, Trinocular Micro Scope Kit, Includes 1080P HD Camera, 23 in LCD Monitor, OMA2, BPTL and BFL0I-LED, 120/230 VAC	SR-072A, TL-180B
270-607*	Trinocular Microscope System, Includes Trinocular Stereo Microscope, 0.4x video coupler, 10x eyepieces and 0.5x Objective lens, Focus Mount, 1080P HD camera, 23 in LCD monitor,	LT-050B, and any weld head with existing microscope mount**
475-549	Jeweler's Loupe	N/A
8-453-01	USB Microscope and Stand	N/A

*Includes image capture software ** Requires BFL0I-LED light source

MAGNIFICATION

In many cases, the process is smaller than what the human eye can see, thus magnification is key to properly observing the process results. We offer a range of different magnification devices that can be used to look at the weld to detect small defects. An eye loupe is an indispensable item that can be used for quick observation. To take pictures of the process, portable, USB microscope, desktop stereoscopes, and trinocular microscopes are available.

FUME EXTRACTION

Spot welding, fusing and brazing are all processes that can eject material of various sizes from the part. Fume extractors are necessary to remove harmful airborne particles so that operators and engineers are not exposed. These sometimes toxic fumes need to be collected and properly filtered. Use the following table to identify the best fume extractor for a given process:

Part Name	Part Number	Process
Fume Extractor-Small	4-61359-01	Spot Welding
Fume Extractor-Large	720-225	Fusing, Brazing

WATER CHILLERS

Water chillers are necessary for cooling higher powered welders. They control the temperature of the water to keep condensation from building when facility water cannot. The following chillers provide the necessary cooling capacity for the approximate kVA rating running at full power and duty cycle. The table below is a general rule, always consider each circuit in the welding system for required GPM (Gallons Per Minute)

Model	Part Number	kVA	GPM (STD)
OTC-1.0A Chiller	4-90837-02	<100	4
OTC-2.0A Chiller	4-90837-05	<200	7
OTC-5.0A Chiller	4-90837-07	<500	12
OTC-7.5A Chiller	4-90837-09	<500	18
Water connector kit, small	4-69984-01		
Water connector kit, large	4-66985-01		

VORTEX COLD AIR BLASTER

Cold Air Blasters use vortex tube technology and filtered compressed air to produce sub-freezing air as low as -30 deg F for numerous industrial spot cooling applications. With no moving parts to wear out, Cold Air Blasters require no electricity, just a compressed air source. The Vortex Cold Air Blaster System includes a magnetic base and a 5 micron auto-drain compressed air filter. Great for spot cooling when water cooling is not sufficient or available.

Compressed air pressure: (psig) 80 – 100

Inlet size: (NPT pipe thread, inches) 1/4

Minimum outlet temperature, deg F: (at 70 deg F inlet air) -10

Air consumption @ 100 psig: (scfm) 15

Outlet air flow rate: (scfm) 2 to 15

Dimensions, inches – overall length: 19 5/8,

Diameter: 1 3/4, nozzle length: 9

PULL TESTER

One method to test the strength of a weld is to pull the two joined materials apart. The 200 lb pull tester can be configured for tension or compression testing applications up to 200 lbf (890 N) for laboratory and production needs. The 10-420-01, 200 lbs pull tester comes with motorized test stand, force gauge, and wedge grips. Platform is customizable for specific applications.

ADAF

Auto drain air filter, 5 micron element, metal bowl with sight glass, differential pressure indicator, for use with all air actuated weld heads.

Part Name	Part Number	Description
PT-200	10-420-01	Pull Tester, 200 lb
VTAC	285-155	Vortex Air Blaster
ADAF	10-373-01	Compress Air Filter

FOOTSWITCHES FOR AIR ACTUATED HEADS

The Model FS2L Two-Level Footswitch is intended for use with all AMADA WELD TECH power supplies. The first level actuates the weld head via the air valve driver of the power supply; the second level, along with the force firing switch in the weld head, initiates the welding current.

The Model FS1L One-Level Footswitch also may be used with all AMADA WELD TECH power supplies. The single level switch actuates the weld head and initiates the welding current simultaneously (when the firing switch closes).

MODEL FS

Single level firing switch without safety guard. Used to fire power supplies immediately upon initiation.

**Model FS
Footswitch**

FOOTPEDALS

The Model CP Cable Pedal pivots under the heel for optimum force control. It is equipped with an adjustable down-stop which prevents the application of excess force. It is rated at 25 pounds, and can be used with the LT-050B-F, TL-080B-F, TL-086B-F, TL-087B-F weld heads.

The Model MSP Medium Force Swing Pedal is fully adjustable for length, stroke, angle and left or right-foot operation. It provides a 5-to-1 mechanical advantage and is rated at 100 pounds. It is used with TL-083B-F, TL-084B-F, TL-088B-F, TL-089B-F, and TL-180B-F weld heads.

DISPLACEMENT SENSORS

Displacement sensors can be used to measure initial part thickness, collapse during weld, and final part thickness. When used with the proper weld control or weld monitor, displacement sensors can also be used to stop the weld when the desired collapse has occurred.

Model	IPB-5000B	MM-400A	WM-100A	MG-300A
GS-1813 (13 mm)	X	X		
GS-1830 (30 mm)				
ST1278 (12 mm)			X	X
ST3078 (30 mm)				

DISPLACEMENT BRACKETS

Holds Heidenhain type displacement sensors ST-1278 and ST-3078 to THIN-LINE series weld heads as noted.

10-202-01, TL-088B Weld Heads
10-203-01, TL-080B Weld Heads
10-204-01, TL-180B Weld Heads

ELECTRODES

Highly conductive workpiece materials generally require electrodes of high resistance. Similarly, hard materials require softer, copper-based electrodes. When welding dissimilar materials such as copper and nickel, the normal choice would be a molybdenum electrode against the copper and a GLIDCOP electrode against the nickel.

If stored energy or half-cycle equipment is used to weld dissimilar materials, place the more resistive material against the negative electrode. Likewise, if similar materials with thickness ratios greater than 4:1 are welded, place the thinner material against the negative electrode.

To clean electrode surface and maintain shape, electrodes should be dressed with either 600 or 1000 grit silicon carbide paper, rather than with a file. Refer to page 7 for polishing disks.

ELECTRODE FORCE GAUGES

Electrode force gauges are used to establish weld schedules and to calibrate weld heads and handpieces. They are color coded to indicate the usable force range. The accuracy is $\pm 2\%$ of full scale.

Model	Capacity	Scale	Notes
FG20*	20 lb	20 lb x 0.2 lb	Serialized
FG100*	100 lb	100 lb x 1 lb	Serialized
FG200*	200 lb	200 lb x 2 lb	Serialized
FG10kg*	10 kg	10 kg x 0.1 kg	Serialized
FG100kg*	100 kg	100 kg x 1 kg	Serialized

*Calibration Certificate models also available

ELECTRODE MATERIALS

GLIDCOP - DISPERSION STRENGTHENED COPPER with 0.15% ALUMINUM OXIDE - 68B Rockwell hardness, 92% conductivity. Longer life, greater thermal stability, higher strength than RWMA 2. Generally interchangeable with RWMA 2 without changing schedules. All AMADA WELD TECH weld heads are supplied with GLIDCOP electrodes.

RWMA 2 - COPPER CHROMIUM ALLOY - 83B Rockwell hardness, 85% conductivity. Used for welding steels, nickel alloys and other high resistance materials.

RWMA 3 - COPPER COBALT BERYLLIUM ALLOY - 100B Rockwell hardness, 48% conductivity. Used for welding high resistance materials requiring high weld forces.

RWMA 11 - COPPER TUNGSTEN ALLOY 99B Rockwell hardness, 46% conductivity. Usually inserted into an RWMA 2 shank. Used for welding cuprous and precious metals. Used for light projection welding dies.

RWMA 13 - TUNGSTEN - 70A Rockwell hardness, 32% conductivity. Usually inserted into an RWMA 2 shank. Cannot be machined but may be ground to the desired shape. Used to weld non-ferrous metals such as copper and brass.

RWMA 14 MOLYBDENUM - 90B Rockwell hardness, 31% conductivity. Usually inserted into an RWMA 2 shank. Machineable. Used for welding copper, silver, gold and their alloys.

UNIBOND® ELECTRODES

UNIBOND Electrodes are used for parallel gap bonding and reflow soldering. Generally, RWMA2 copper UNIBOND Electrodes are used with resistive and/or hard materials such as gold plated kovar and nickel. Molybdenum UNIBOND Electrodes are used for bonding conductive or soft materials such as copper or gold. The face of a UNIBOND Electrode is 0.020 in (0.5 mm) wide by 0.030 in (0.75 mm) deep. In unfixed applications, this limits their use to bonding ribbons (wire) which are at least 0.010 in (0.25 mm) wide because of the limited visibility.

Model	Material	Length	FACE		
			Width	Depth	Length
EU1000	RWMA2	1.125 in	0.020	0.030	0.080
EU1002	RWMA2	2 in	0.020	0.030	0.080

EU2030MR	Moly	1.125 in	0.020	0.030	0.080

UNITIP® ELECTRODES

UNITIPS are electrodes for parallel gap bonding of gold plated kovar, copper, or gold ribbons (wires) which are smaller than 0.010 in (0.25 mm). They are made from two pieces of molybdenum, which are permanently bonded to an insulating spacer. This fixed gap and bonded construction results in a tip which wears uniformly when properly dressed. The length of the UNITIP and the flat area on the front allows it to bond ribbons extremely close to the walls of packages as deep as 0.450 in (11.5 mm). The narrower THIN-LINE "L" series UNITIPS have a tapered profile, enabling them to be used closer to the corners of packages.

Special size cables can be purchased on request

A 4-36578-01, voltage cable, 15 ft long with flying leads (large scale applications typically) 	A 4-35670-01, voltage cable, 6 ft long with #2 stud size ring terminals 4-35670-02, voltage cable, 6 ft long with #6 stud size ring terminals 4-35670-03, voltage cable, 6 ft long with #8 stud size ring terminals 
B 10-381-01, Firing switch Extension Cable, 6 ft long 	J 18-042-01, Current Coil Extension Cable, 15 in long 
C 18-045-01, Transformer Sense Cable, 15 ft long  Mates with IS-Series welders and IT-XXXX-X transformers *Not for use with IS-300CA	K 18-046-01, transformer sense cable, 6' long, mates with IS-300CA and IT-XXXX-X transformers 
D SRCN6A21-16P, Multi-pin Connector 	P Standard Firing Switch Panel Mount Receptacle #18 AWG 550-001 
E AA-8801, GS-1830 Extension Cable, 15 meters, used with MM-400A and IPB-5000B-MU 	S #18 AWG Firing Switch Plug-Male 520-001 
F #18 AWG 4-PIN Female Receptacle for Footswitch 550-006 	T #18 AWG Firing Switch Jack-Female 520-011 
G #18 AWG 4-PIN Male Plug for Footswitch 520-009 	V DFS/88 Dual Firing Switch Adapter, series configuraton 
H #2 AWG Cable Connector (for HFP) 4-02688-01 	W #6 AWG Cable Connector 4-28071-02, used with PHP and THP 
X 1. Voltage Sense panel mount receptacle-Male 550-070 	2. Voltage Sense plug- Female, 520-110 

ELECTRODE HOLDERS AND ADAPTERS

SL-320 Series Electrode Holders

Part Number	12-100-01	12-100-02	12-102-01	12-103-01	12-103-02	12-101-01	12-101-02
Part Name	Opposed holder inline	Opposed metric holder inline	UNITIP holder	UNIBOND holder	Microjoin holder	Opposed offset holder	Opposed offset metric holder

* includes all mounting hardware

STARTER KITS

Starting new welding project can seem daunting at first. Not only do you need to purchase the welding equipment, but also need to consider peripheral equipment to ensure that the process is successful and safe. We have created start-up kits for the different products to help you get started.

Kit	10-415-01	10-416-01	10-417-01	10-418-01
Includes	Includes 20 lbs force gauge, 1000 grit polishing disc, 10X loupe, safety glasses and various electrodes	Includes 20 lbs force gauge, 1000 grit polishing disc, 10X loupe, safety glasses and various electrodes	Includes 100 lbs force gauge, 600 grit polishing disc, 10X loupe, safety glasses and various electrodes	Includes 100 lbs force gauge, 600 grit polishing disc, 10X loupe, safety glasses and various electrodes
Weld Head Model	TL-080B and SR-071B Series	TL-088B Series	TL-180B and SR-073 Series	TL-188B Series

CALIBRATION KITS

Calibration of your equipment is essential to maintain proper operation, calibration should be done on an annual basis. These kits include everything needed to calibrate the UB series or HF-2500A/HF-2700A power supplies. Choose the kit with or without oscilloscope depending on your needs.

Part Number	Part Name	Description
10-377-02	UB Series Calibration Kit	Calibration kit for UB Series, includes shunt, cables and necessary hardware
10-377-03	UB Series Calibration Kit with Oscilloscope	Calibration kit for UB Series, includes oscilloscope, shunt, cables and necessary hardware
10-410-01	HF-2500A/HF-2700A Calibration Kit	Calibration kit for HF-2500A/HF-2700A, includes shunt, cables and necessary hardware
10-410-02	HF-2500A/HF-2700A Calibration Kit with Oscilloscope	Calibration kit for HF-2500A/HF-2700A, includes oscilloscope, shunt, cables and necessary hardware
